

We are implementing a new telephone system

This will improve the way we communicate with our patients.

- Patient Callback option - which means you no longer have to sit and wait in the queue
- Improved menu choices to help direct you to care you need
- In-call messaging to help keep you updated on practice information
- Patient appointment self-service features
- SMS notifications
- Video calling option

We will be introducing new menu options when you call the practice. Please listen carefully as they will help you navigate to the care you need.
